### About This Workshop:

According to OSHA, 22 million workers are exposed to potentially damaging noise at work each year. Last year, U.S. business paid more than \$1.5 million in penalties for not protecting workers from noise.

While it's impossible to put a number to the human toll of hearing loss, an estimated \$242 million is spent annually on workers' compensation for hearing loss disability.

This **lunch and learn** seminar will help safety professionals and supervisors improve their workplace hearing conservation programs with practical information on noise-induced hearing loss (NIHL), and the latest technology.

Attendees will enjoy lunch during the seminar.

### Workshop Description:

This lunch and learn workshop will cover the:

- Basics of noise-induced hearing loss (NIHL)
- Key elements of an effective hearing conservation program
- Impending changes to the noise reduction rating (NRR) and how it impacts participants' hearing conservation programs
- Employee motivation and training techniques / resources
